

Collaboration with Workers Educations Association (WAE)

Ore Valley are collaborating with WEA to bring educational opportunities for all to the local area. The courses being offered are free for all to attend and will include the following two subjects:

Science for a Successful Scotland and Supporting children's Numeracy

The aim of these courses is to promote the introduction of science topics in an interesting, inspiring, and engaging way in community settings, colleges, and schools. The resource was designed for learners who are likely to face barriers to learning or want to return to learning. It was also developed with 'Family Learning' in mind to help parents help their children with their own learning in sciences and increasing their science capital.
