

Health & Safety Forum Construction Design Management (CDM)

Our H&S Forums are a valuable opportunity where members receive support and advice from ACS and EVH, whilst networking with other EVH members. Join us for our first quarterly H&S Forum where we will cover Construction Design Management (CDM).

The CDM Regulations 2015 are designed to ensure that the risks associated with construction work are properly managed. The CDM Regs apply to any building, civil engineering or engineering construction work and includes the construction, alteration, conversion, fitting out, commissioning, renovation, repair, upkeep, redecoration, other maintenance, de-commissioning, demolition or dismantling of a structure.

FORUM CONTENT

- An overview of the CDM Regulations 2015.
- The key elements to ensuring construction health and safety are complied with.
- The importance of defining the various duty holders roles within a construction project.
- Documentation requirements during a construction project.

The session will be led by Emma Willey, Managing Director, ACS Learning & Consultancy and is aimed at any staff or management with responsibility for health and safety.

TIMING

9.30am - 12.30pm

COSTS

This is a FREE session for all EVH members.
