ABOUT THE EVENT

We are pleased to invite you to our upcoming **Health and Safety Forum – a joint event by EVH and ACS**. This exclusive session is designed to provide valuable insights, comprehensive support, and guidance on the latest regulations, legislation, and best practices for housing associations in Scotland.

Whilst out and about talking to many of you over the last few months, we have seen a pattern of many EVH members who have a good history with their Health and Safety but have had significant staff changes over the last couple of years. Consequently, those responsible for H&S for tenants may be feeling overwhelmed, unsupported and unsure of where to go next. For this reason, we are hosting regular H&S Forums to allow members to network and receive support and advice from ACS, EVH and other EVH members. The forum for the next topic will be:

Lone Working and Protecting Staff from Violence and Aggression

This will be an informative forum that includes practical tips, ideas and strategies for managing lone workers in your organisation and protecting them from violence and aggression. This session is free, and we encourage you to take advantage of this unique opportunity to connect with fellow EVH members through our engaging group activity.

Note the numbers for this session are limited. To book please complete the booking form and return to Events@evh.org.uk or phone **0141 352 7435** with any queries or requests for further information

The Forum Will Include:

- Keeping lone workers safe in your office/premises.
- Keeping lone workers safe whilst out in the community.
- Managing violence and aggression from tenants, service users or members of the public.
- Discussion on different methods and technologies available for monitoring and managing lone workers out in the community.

Practical Element - Group Work

Engage in group discussions delving into real-world scenarios and the practicalities of managing lone workers and protecting them from violence and aggression.

Ask the Experts: Your Health & Safety Queries Answered

Participate in dynamic discussions during the forum where our expert panel will address any questions you may have.
